

Before and after! In which would you rather swim?

Before lockdown – Google Earth

After lockdown – Solent News

Because of the lockdown, sea traffic has decreased a lot on the Solent leaving less pollution and disturbance of the sea and everything beneath it. You might recognise this particular place (Tip: look at the shape of the nearest building!)

Task: What photographs would you take with your underwater camera in this beautifully clear water off the coast of Southsea? Think: which new creatures might be attracted to our crystal-clear waters? Use the templates below OR be creative and present your work in your own way.

Caught on Camera!
