

WIDER CURRICULUM HOME LEARNING – KEEPING SAFE

This week's theme is all about Keeping Safe – we have devised a range of activities from keeping safe on the Internet to keeping safe when we are out and about now that lockdown restrictions have been lifted. (Optional activities)

Sun Safety

We have been really lucky with such a long spell of hot, dry weather but it is so very important to stay safe in the sun. Complete these activities to help you learn why it is so very important.

<https://safeYouTube.net/w/3ZeJ>

<https://www.bbc.co.uk/newsround/48609398>

Could you design a poster to show others why it is important to stay safe in the sun?

Show others how to pack a bag for the beach.

Could you design some funky sunglasses or a sun hat for you or celebrity wear in the sun. Label the important features.

Follow the links on the Newsround website and learn how to look after your pets in this weather – how will you present this?

Internet Safety

During lockdown we have been using a wider range of internet applications to support our learning, for example: Seesaw. By using Seesaw you/your parents have given permission to put your work on the internet.

What does giving permission mean? How you can keep safe on the internet.

<https://www.youtube.com/watch?v=-Kq3nvC8La0>

Now write down 3 things that are personal to you.

Would you tell a stranger these things?

If not, why not?

Create an ICT Permission pledge Poster– include:

- who you need permission from online?
- When you might need it?
- what permission means
- What is safe to share on the internet
- What is NOT safe to share on the internet

Road Safety

As many of you enjoy cycling, we would like you all to be aware of how to keep safe when riding your bikes out and about.

<https://www.youtube.com/watch?v=dkoVxBnnGko>

Can you create an online advertising campaign?

The aim of the campaign can be either:

- To encourage more children their age to cycle
- To encourage more children their age to take on Bikeability cycle training (we do this in School)

The emphasis is on how to cycle safely.

You need to begin by researching cycling safety and decide on a single key point to get across, such as wearing helmets or using lights.

Then decide what your web campaign will consist of – it could have video, animation, images, adverts or a slide show.

You can use PowerPoint or other media to present your ideas in storyboard fashion, with slogan and other details.

Staying safe in our bubble

What are the main points we need to remember when we are at school working in our bubbles?

How does the appearance of school differ from before this half term? What can't we do? What can we still do?

Create a leaflet to keep everyone at school safe.

Safety in the home

Watch the video on how to be safe around electricity.

<https://www.bbc.co.uk/bitesize/topics/zjrrd2p/articles/z96ckqt>

Help Seymour identify the three electrical safety risks.

How did you know what the risks were?

Water Safety

As some of you are swimming in pools at home or going to the beach – do you know how to stay safe near or in water?

<https://www.youtube.com/watch?v=TsfyOowCuxc>

How can you stay safe at the beach?

Can you create a poster to warn people of potential hazards? And advise them how to stay safe?

REMEMBER TO SHARE YOUR WORK WITH YOUR TEACHER USING SEESAW OR THE CLASS EMAIL ADDRESS 😊
