

## Maths challenges

Make these correct:

$$\square \square 2 \square + \square \square 2 = 200$$

$$\square \square 4 \square + \square \square 8 = 500$$

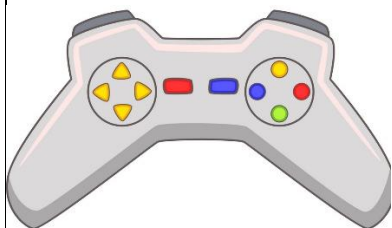

$$\square \square 7 \square + \square 2 \square \square 6 = 500$$

Make sure you use a method to **check your answers**.

### How many days?

1. How many days are there in September, October and November altogether?
2. How many days are there in March, April and May altogether?
3. How many months have 30 days?
4. How many months have 31 days?

### Game time...

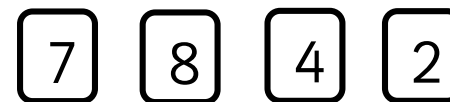

Morgan is playing a game.  
He has 4, 323 points.  
He then scores another 546 points.

His target is 6000 points.

**How many points does he need to score to reach his target?**

### Layla's number

Layla has these number cards. She uses each card once to make a four digit number.

She places:

1. 8 in the tens column
2. 2 so that it has a higher value than any of the other digits
3. The remaining two digits so that 4 has the higher value.

**What number does Layla make?**
