

Gardening Club Wheelbarrow Game

I can subtract numbers with up to three digits using a formal written method.

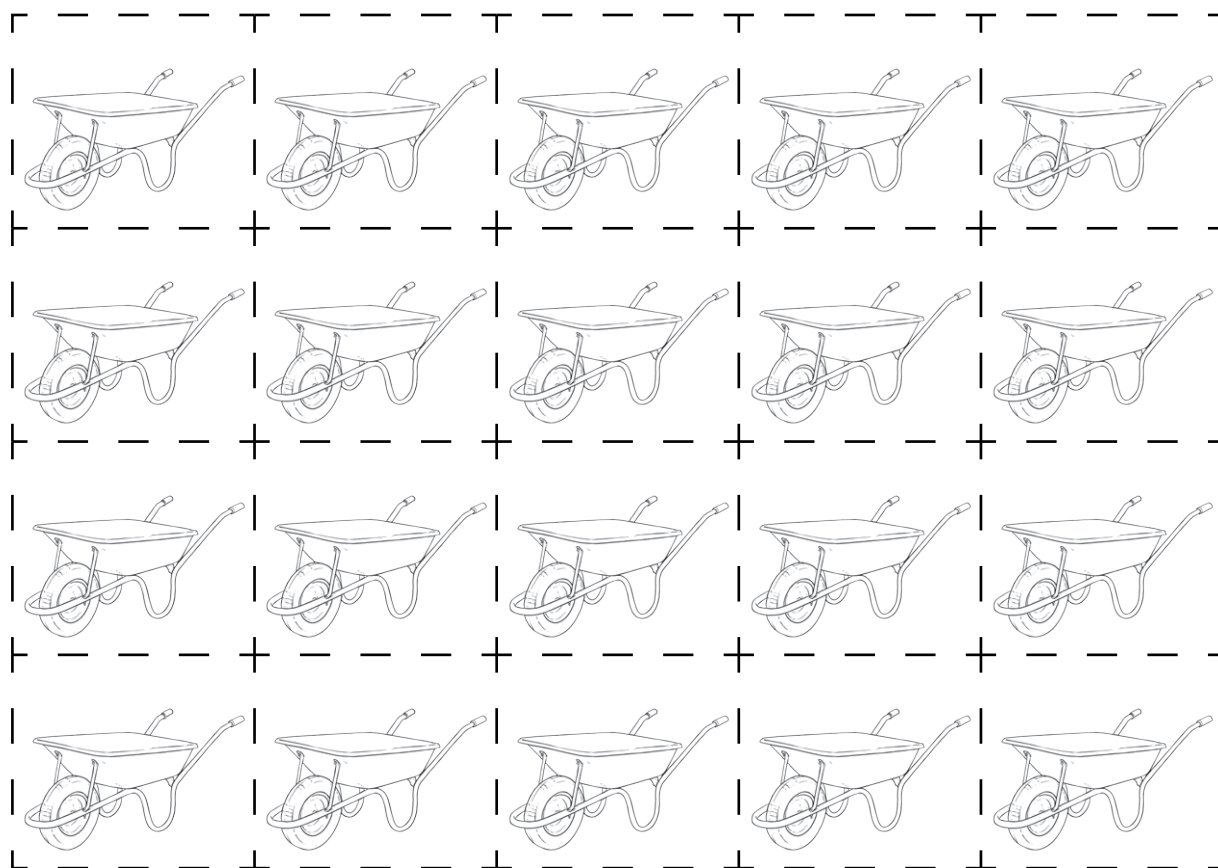

Instructions

Once you have decided which wheelbarrow track you would like to play on first (you both need the same track), cut out your wheelbarrow and place it onto the track. On the count of three, start to complete the calculations along the track. Don't forget to move your wheelbarrow along the track. The first person to the end of the track with all the correct answers wins!

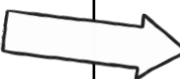

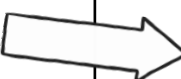

Afterwards, check the answers on a calculator. If one or more of the winner's calculations are incorrect, they have not won the race, so remember to check your answers after each calculation.

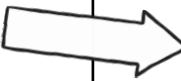

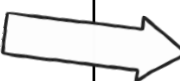

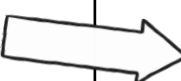

Cut out your wheelbarrow to place on the track.
